Figma file structure. How to use .fig files

As mentioned above each .fig file includes the designs of all pages and components related to the particular demo. Each file is divided into 2 main sections: Pages and Components.

Each page is divided into group of layers related to the particular section of the page (see attached screenshot below)

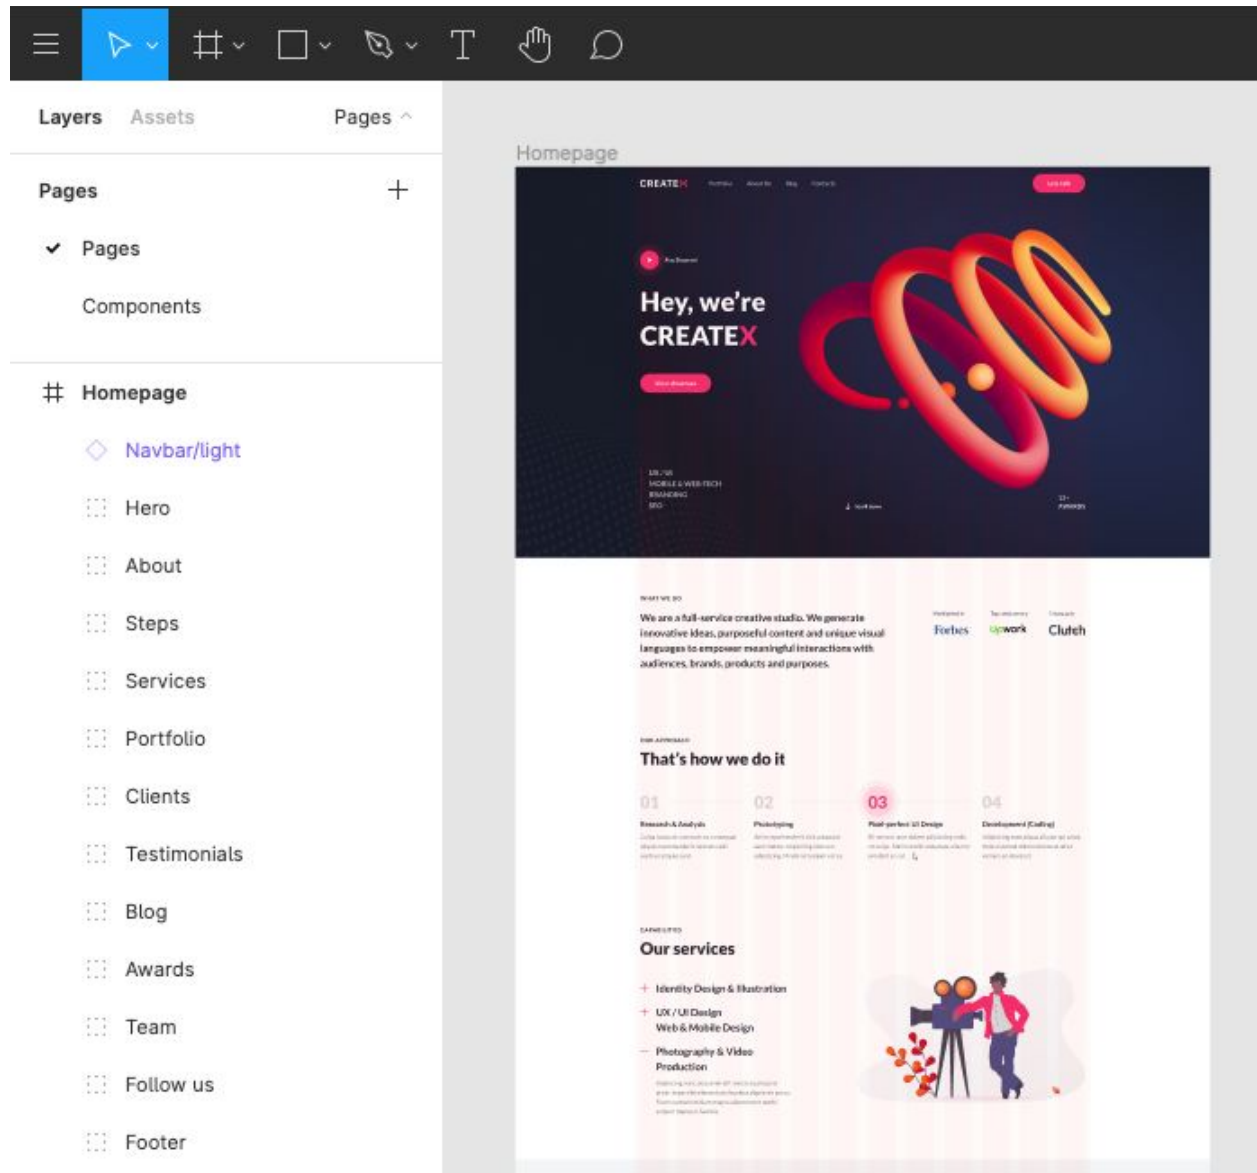

File with .fig extension can be used inside Figma software either uploaded to web version or inside the desktop application.

Figma Web App - <https://www.figma.com/>

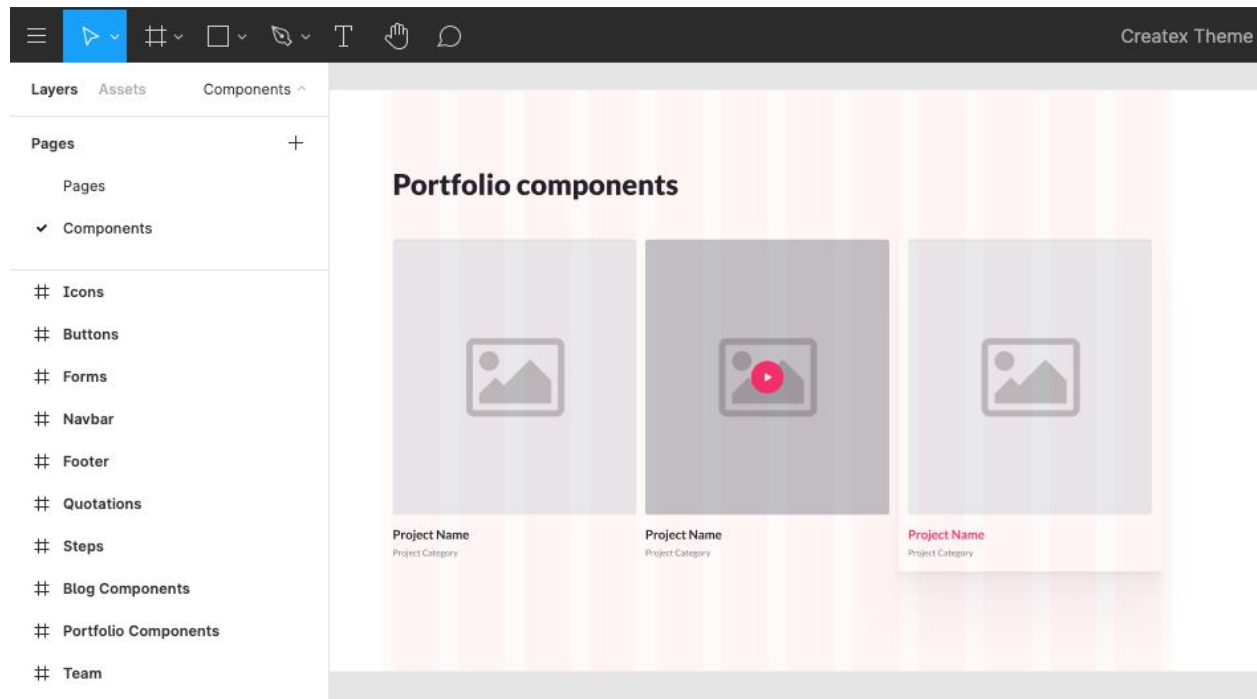

Download Desktop App - <https://www.figma.com/downloads/>

Components are a powerful feature in Figma. Learn more about components here - <https://www.figma.com/blog/components-in-figma/>
