

Multipurpose Directory & Listings Figma Template

Download package structure

The package you have downloaded from ThemeForest include the following files:

- **Finder.fig** - all pages and components designs
 - **Documentation.pdf** - docs you are currently reading
-

Figma file structure. How to use .fig files

As mentioned above each Finder.fig file includes the designs of all pages and components. The file is divided into main sections: Page groups and Components.

Each page inside page group is divided into group of layers related to the particular section of the page (see attached screenshot below)

File with .fig extension can be used inside Figma software either uploaded to the web version or inside the desktop application.

Figma Web App - <https://www.figma.com/>

Download Desktop App - <https://www.figma.com/downloads/>

Components are a powerful feature in Figma. Learn more about components here - <https://www.figma.com/blog/components-in-figma/>
